

Vehicle Tracking

10/29/2025 9:47 am CDT

Overview

Keeping track of company vehicles can be challenging when drivers are constantly on the road. While ServiceMinder can track mobile app users' locations, this only works if tracking permissions are enabled on their phones and the app is actively running.

For brands that need a more reliable or detailed way to monitor vehicles, ServiceMinder offers **GPS vehicle tracking** through integrations with select third-party fleet management tools. These integrations allow you to view real-time vehicle locations and route stop details directly within ServiceMinder, giving you greater visibility into your fleet's activity.

This article will review:

- [Vehicle Labels](#)
- [Integrations for Vehicle Tracking](#)

Settings and Navigation

You will need to have an integration that tracks your company cars. See the [Integrations for Vehicle Tracking](#) section below to review which integrations are available through serviceminder.

To use, go to **Control Panel > Vehicles** (in the **Users and Resources** section).

[Vehicles](#)

Track your vehicles.

Vehicle Labels

If you are integrating information that has already been created in a vehicle tracking tool, they should carry over and automatically appear with the labels and names that you created. You just need to select the **Driver** from the drop down list of Service Agents then click the **Apply** button.

Vehicles Connect...

1

Actions	Label	Name	Active?	Driver
Edit	Toyota FJ Cruiser 2007	Test Vehicle 237	Yes	<div>Avis Agent</div>

Apply Drivers

Vehicle Geotracking

You can click **Edit** next to the vehicle and change the label or name if desired.

Edit a Vehicle

Label*

Toyota FJ Cruiser 2007

Name*

Test Vehicle 237

If you click on one of the vehicle icons on the map or the name of the vehicle, you will go the details page. Here, you see the stops the vehicle has made and the route the car took. This is shown by the yellow line on the map.

Logistimatics

Logistimatics has solutions so you can connect your fleet and other assets to get real time location, trip history, maintenance alerts, and engine diagnostics. Easy to install, easy to use and no long term contracts.

Tracking Assets

Logistimatics sells GPS tracking devices and service for individuals and businesses. They provide realtime GPS tracking for vehicles, fleets, assets and people.

GPS Tracking for Real World Problems

Logistimatics has a broad line of GPS tracking solutions, ranging from vehicles, shipments, containers and other high value assets. Battery monitoring ensures devices are always powered up and ready to report their locations. The integration with serviceminder.io enables associating devices with team members and other scheduled resource so you always know where they are (and were!).

You can purchase a tracker for \$49.95 and then pay for monitoring month-to-month at \$14.95/mo or subscribe for a full year at \$11.95/mo.

Buy your [Logistimatics trackers now](#). Mention offer code SQUAD.

FAQs

How do I set up the integration?

Go to **Control Panel > Integrations**. Then select the **Other** tab. Under the correct third-party tool, you should see a **Connect** hyperlink. This will take you too the entry portal for that tool. You most likely just need to put in your login information and allow access. Then the connection should be created.

How do I remove a vehicle that I no longer need?

You can click on the name of the vehicle. On the vehicle details page, there is a Delete button in the top right.

How do I disconnect the vehicle tracking?

There is a disconnect button on the Vehicles page, or you can go to **Control Panel > Integrations > Other** tab and disconnect the sync from there.
